INTRODUCTION

This guide contains instructions on how to send an SMS via Email using any email client. There are two methods available, send a single SMS or send bulk/multiple SMS's from one email account.

SINGLE SMS - HOW TO SEND

The following settings are available. Those in **red** are mandatory.

All emails must be addressed to <mobilephoneNumber>@mymobileapi.com and must contain the correctly formatted subject line, have a from email address and contain a message

Email Field	Description
From	Your email address
To	The To address must start with a mobile number and contain the domain in the address. E.g. 0721234567@mymobileapi.com. Only one email address will be accepted.
Subject	<p>Options: All options must be separated by braces.</p> <ul style="list-style-type: none">• [un=myusername] – Your portal username• [pw=mypassword] Your portal password• [ack=1] – When set to 1, we will send an acknowledgment via email that the email to SMS request was received, and if it was processed.• [fwdmo=1] – fwdmo can be set to [fwdmo=1] or [fwdmo=example@email.com] When fwdmo is set to [fwdmo=1] replies will be sent to your From email otherwise when fwdmo is set to [fwdmo=example@email.com] replies will be sent to the valid email address specified (in this case example@email.com) <p>An example of a correctly formatted email subject line: [un=xxx][pw=123][ack=1][fwdmo=1]</p>
Body	The message you wish to send to the mobile phone. This can be in plain text or HTML. All html tags will be stripped from the message and only the text will be sent.
CC	Not Used
BCC	Not Used

Single SMS - Example of Sending

1. The subject line contains the minimum required information, un and pw

The screenshot shows an email client window titled "[un=xxx][pw=123] - Message (HTML)". The window has a menu bar with "File", "Message", "Insert", "Options", "Format Text", "Review", and "Adobe PDF". On the left, there is a "Send" button with a paper plane icon. The main area contains the following fields:

From	api@mymobileapi.com
To	0721231231@mymobileapi.com
CC	
Subject:	[un=xxx][pw=123]

The message body contains the text: "This is my message."

2. The subject line contains the minimum required information, un and pw, and the optional parameters, ack and fwdmo.

The screenshot shows an email client window titled "[un=xxx][pw=123] - Message (HTML)". The window has a menu bar with "File", "Message", "Insert", "Options", "Format Text", "Review", and "Adobe PDF". On the left, there is a "Send" button with a paper plane icon. The main area contains the following fields:

From	api@mymobileapi.com
To	0721231231@mymobileapi.com
CC	
Subject:	[un=xxx][pw=123][ack=1][fwdmo=1]

The message body contains the text: "This is my message."

BULK SMS - HOW TO SEND

The following settings are available. Those in **red** are required

All emails must be addressed to `bulk@mymobileapi.com` and must contain the correctly formatted subject line, have a from email address and contain a message.
